

A-151 Silane

Product Description

Chemical Name: Vinyltriethoxysilane

CAS NO. : 78-08-0

Specifications

Appearance	Colorless transparent liquid
Colour(Pt-Co)	≤ 25
Specific Gravity (ρ 20°C, g/cm ³)	0.898-0.908
Refractive Index ($n_D^{25^\circ\text{C}}$)	1.3955–1.3965
Purity (%)	≥ 98.0

Applications

1. The product is mainly used in cross-linking of polyethylene; surface treatment of unsaturated polyester, polyethylene, polypropylene resin and other glass fiber reinforced plastic; composite of special coatings; adhesives; surface damp-proof treatment of electronic components; surface treatment of inorganic siliceous filler and it can also used in surface treatment of middle layer of compound glass.
2. Applied in Copolymer of Ethylene and Vinyl acetate; Chlorinated Polyethylene; cross linking of Chlorinated Polyethylene , Acrylic and B vinegar.
3. Applied to dip-treating glass fiber and inorganic siliceous filler. It can copolymerize with several monomers and be cranked out to be special coatings. It also can be used to treat special rubber filler, produce sealant of electronic components plastic materials and surface damp-proof treatment.

Packing

25 kg, 200kg plastic or iron drum
